DETAILS OF SANITIZATION ARRANGEMENTS MADE FOR PUBLIC:

Arrangements have been made in the campus as per Standard Operating Procedure:

- Thermal screening of public
- Hand washing facility units are created at the entrance near the Ticket Booth and near the exit door of the Sky-theatre
- Floor markings are made to guide public to maintain physical distance
- Online ticket booking and digital payment using UPI for counter booking in place
- Hand Sanitizers are placed at several places in the building
- Alternative seats are only allotted in the Sky-theatre to maintain physical distance. This has reduced our seating capacity to 110 per show.
- Sanitization of the Sky-theatre after each show with sprayer/fogging machine

In addition to the above requirement as per SOP, following additional arrangements have been made:

- Foot operated valves and auto flushing sensors for non contact use of toilets.
- Special arrangements made for sanitising the building and Sky-theatre by fogging of the area.
- Ultra Violet Germicidal Irradiation unit is being installed in the AC plant for creating sterilized environment in the sky theatre and exhibition hall.

All the above arrangements are made using the donation given by M/s. Kewaunee Labway India Pvt. Ltd, Bengaluru through Rotary Lakeside, Bengaluru

Science Park:The JNP has a Science Park with over 50 exhibits. Arrangements are made to see the demonstration of working of these Science Models using Augmented Reality app called FlippAR. Visitors can download the 'app' and scan the QR code on the board placed next to the object to see the demonstration. This arrangement will help in learning about these Science Models maintaining physical distance which ensures safety.
