

# **JAWAHARLAL NEHRU PLANETARIUM**

**Bangalore Association for Science Education**

## **Science Club discussion on Science behind Economics (Part – II)**

For the month of December 2019 Science Club is held on third Sunday of the month. It is mainly targeted at the students studying in classes VIII-XII in order to evoke curiosity and develop scientific temper among them. Interested PUBLIC can also attend the session as it will be at basic level.

As discussed in the previous session this month Science club will continue on the second part of the theme Science behind Economics.

Economics decisions influence everyday human lives. The way loans are disbursed by banks, the volume of money to be printed, exchange rates for global currencies, the investments made in a country, etc all have economics underpinnings.

In this session the science behind some of the fundamental aspects related to economics shall be discussed. Is economics really science or art? Can we predict the outcome of economic decisions the way we do in science? If it is science how to take rational decisions? If it is art how to express it better? These questions among other related topics will be touched upon.

**Eligibility : Students of Classes VIII to XII;  
Interested Public**
